Energy, Utilities & Telecommunications

Energy, Water, and Communications Priorities for COVID Relief

Essential Utility Services During the Covid-19 Pandemic and Beyond

Implementing a Roadmap to Utility Service as a Human Right

Access to affordable energy, water, and telecommunications services are essential necessities for modern life. Loss of these services can threaten the health and safety of vulnerable households, as well as access to their housing. NCLC works with federal and state policymakers, utility companies, and advocates on policies and programs to maintain fair and affordable utility services for low-income families.

- Energy Efficiency and Multifamily Housing
- Electric Vehicles (EVs)
- Stay Connected
- LIHEAP and Fuel Assistance
- Weatherization & Home Energy Efficiency
  - Property Assessed Clean Energy (PACE) Loans
